

Student Learning and Teaching Group

We actively seek students' views at Settle College on a very regular basis. Students' views are sought in many different ways:

- “Student Voice” group during subject reviews; where students complete a survey and give their views on the subject being reviewed
- Students on interview panels
- Student Council and Sixth Form Committee
- Student discussion groups on changes to the school e.g. a student discussion group on the new uniform, changes to the school day, Drugs Policy etc.

The Student Learning and Teaching Group

Some of the members are pictured below. The group meets with the Vice Principal on a regular basis to research key areas of learning and teaching in the school. So far the group have carried out some research on our new Marking and Assessment Policy, and have sought student views on the assessment for leaning stickers. Once the group had completed their research they fed back their findings to the Leadership Group. The Student Learning and Teaching Group have also fed back to staff the ways in which students learn best at Settle College. The group were also filmed giving their views on aspects of Assessment for Learning, and the DVD was used for staff training.
