

<p>Dear Year 7,</p> <p>I've been through the best experience ever! In English, we talked about homophones and language features. In maths, we did number sequences and in science we learned about rockets. In the scavenger hunt, we got sorted into groups and toured around the school and answered questions. We also made videos about the school rules. They are ready, respect and safe.</p>	<p>Dear fellow year 7s,</p> <p>Through the week, we did lots of amazing things and met new people and new teachers. We did maths, English, science, geography, sports, transition activities and team building. We also learned more about the school, including the rules of the school.</p>	<p>Dear year 7,</p> <p>I have had an awesome time at Summer School. I have met amazing new teachers and lots of amazing new friends. In maths, we heard about consecutive numbers which means numbers that go in a row like 1,2,3,4. In science, we learned about rockets and how they set off and come back down. We made protections for an egg and dropped it down some stairs. In English, we learned about verbs, adjectives and homophones. In PE, we played lots of games and played basketball. I have done loads of lessons and I have loved them all. On the last day, we got a certificate. Overall, I've had a brilliant time at summer school.</p>
<p>Dear year 7,</p> <p>I've had an amazing time in summer school and met some awesome teachers. I have also had lots of time to meet new people and make some new friends. In English, we did about homophones. In science, we did about space and in maths, we did, well, maths! In geography, we had to find the perfect area to place a bench. In sports, we did line ball basketball and tennis rounders. Overall, I think summer school was an amazing experience.</p>	<p>Dear Year 7s,</p> <p>This week we have done a variety of different activities. In my opinion, science was the best because we made an exploding rocket using a tablet and a film cannister. We also did literacy; different kinds of sentences, homophones and a persuasive letter. Geography was fun because we were finding the best place to put a picnic bench. In maths, we did lots of games and number sequences like the Fibonacci sequence. And finally, we played lots of games in PE. Most of them were outside but we went into the gym too. It was a fun week and I think we all enjoyed it! I can't wait to meet all the rest of year 7 in September.</p>	<p>Dear year 7s,</p> <p>This week has been great at the college summer school. I loved making new friends and seeing old friends. My favourite subject that we did was probably PE and science because we had a great game of numbers basketball in PE and in science we made an explosion! I can't wait to come back and see all the teachers again.</p>

Dear year 7,

I've met some awesome new teachers and new friends. In science, we learnt about rockets setting off and landing. We made a protection for an egg and dropped it down the staircase outside the Bradley Building. In maths, we learnt about consecutive numbers which means numbers that go in a row. For example, 1,2,3,4 and 5 are consecutive numbers. In English, we learnt about sentence types and homophones with Mrs Jones. We also learnt about verbs, adjectives and nouns, and played a fun game involving them. In geography, we were measuring the wind speed to figure out where the best place for a new lunch bench would be. In the last lesson, we wrote a letter to the governors explaining why we want a bench and where we would put it. We also did a lot of extra things like a scavenger hunt around the school. We all played a big game of basketball together as well. We had delicious lunches, including chocolate! We got lots of cool presents like a frisbee, a book and finally, on the last day, a graduation certificate.

Dear other year 7s,

We have had an amazing week at summer school, full of fun and incredibly good school dinners! On Monday, even though some people's nerves (including mine) were overwhelming them, we still had so much fun. Everybody was so friendly! We did team building, English and maths. Mrs Whitaker (the geography teacher) gave us all a globe that bounced and you could squish! We also did PE; we played diamond tennis and a basketball game. It was all so fun!

Dear year 7s,

This week was amazing! I made so many new friends and the activities were terrific! My favourite was the treasure hunt as I got to see pretty much the whole school. It was good because it brings people together to become a team. I had so many laughs and so much fun making new friends. Science was my favourite class as we did really cool experiments. PE was so fun. I was very warm running around in the sun and learnt so many things like how black attracts heat! Maths and measuring the wind in geography were fun too. My favourite subject is science but all of them were amazing! The teachers are really nice. I feel a lot more confident about coming here in September. Yesterday, I was really worried and now I am not! This week has been amazing. I loved it so much. I got the chance to meet new people. I met so many new friends and got to do so many exciting lessons.
