

Yr 12 induction work For Cambridge Technicals L3 in IT:

You will use Wix to make a PROTOTYPE (i.e. it doesn't actually have to work) website next year.

So this year, I want you to become a confident Wix user.

Pick a topic. Ideally an ecommerce website – shopping, food, travel etc.

### **Task 1: Website analysis**

The type of website you want to do. I.e. Fast food delivery website. Find existing ones on the web.

Using sketches and notes, what goes on the first (index) page?

What are the other pages? What content is on the other pages?

Do this for 2 to 3 websites

### **Task 2: Web design**

Use the information from your Website analysis.

Using sketches and notes, what does your index page look like?

How are you going to link the pages? Buttons? Drop down?

House style?

Other pages? What goes on them?

### **Task 3: Website prototype**

Make an account with Wix and make the website prototype.

IT DOES NOT HAVE TO ACTUALLY SELL ANYTHING!

There are lots of YouTube videos to help with this.

Ask if you have questions or get stuck 😊
